
Sportsman Parachute 180-220mph

Description

Sportsman Parachute 180-220mph (DJ851067)

DJ Safety manufactures these parachutes to suit vehicles that run between 180-220mph. This makes it suitable for many classes of cars, from fast Super Sedan's to Funny Cars and Dragsters in Supercharged Outlaws. They are made from a very strong long lasting material that can take the beating of going round after round as common within the sportsman ranks.

The chutes are a 12ft crossform design with eight canopy lines. They are designed to be used for vehicles reaching up to 220mph. When running over 200mph you require 2 parachutes for your car!

Parachutes come ready for racing, complete with Pilot Chute, Black chute pack and Safety flag/pin. Available in a variety of colours.

Features:

- Pack is reinforced Black Nylon with 4-door lid.
- Main chock sleeve is covered in Black Nylon.
- Main canopy panels constructed of reinforced ripstop nylon with 8-point attachments.
- Leather reinforced Pilot chute features a compression launch spring system
