

DJ Safety Pilot Chute

Description

DJ Safety Pilot Chute (DJ852809)

DJ Safety pilot chutes are built tough to take the beating that every pilot chute endures. They start with a powdercoated compression spring and are finished with a nylon chute and straps with leather reinforcing on all of the wear points.

The bridle line is sold as a separate item, check your old one as you may be able to use that.

The DJ Pilot Chute can be used with DJ, Simpson, Deist and Impact chutes also.
