

Setrab Brackets

Short Description

Setrab Brackets

Description

These mounting brackets are just what you need to mount your Setrab cooler . We recommend this style of mounting for any car that might get a bit of twist in the chassis or any application where you are going to give the cooler a hard time. This inexpensive bracket kit allows the cooler a little movement so if there is chassis twist it wont hurt the cooler core.

Available in sizes to suit our narrow, standard and wide oil coolers.
