

Protect-A-Boots

Short Description

Protect-A-Boots

Description

Protect-A-Boots are made from a high temperature resistant glass fibre material and treated with a proprietary coating,

Protect-A-Boots provide spark plug boot and wire protection from extreme under hood heat.

- Double-wall construction for added durability
- Helps prevent burn-through, hardening and cracking of boots
- Installs in seconds
- Universal-fits most straight or angled boots
- Withstands 1200°F direct continuous heat
- Non-flammable & protects against chemicals & resists water
