

Evans Waterless Coolant

Short Description

Evans Waterless Coolant

Give us a call on 09 525 6858 to find out price and availability.

Description

Evans High Performance Coolant provides superior cooling protection for all gasoline and light duty diesel engines, including marine and light aircraft. In conditions from -40° to 375°F; High Performance Coolant provides cooling protection through constant liquid coolant contact with engine metals. Eliminates water-causing corrosion, electrolysis and cavitation. One successful installation provides cooling protection for the life-time of the engine, reducing maintenance time and expense.
